BIO

Determined and motivated Engineering Manager focused on cost-effective web/software project completion. Adept at fostering and sustaining professional and productive relationships with business stakeholders. Knowledgeable in retail e-commerce, complex system integrations, and oversight of large projects and initiatives. Clear communicator, decision-maker, and problem solver with the ability to make information relatable to non-technical personnel.

EXPERIENCE

Senior Manager of Engineering - ModCloth
Los Angeles, CA | 2020 - Present
• Responsible for supervision, development, and assigning of projects from conception to completion.
• Directly supervised four engineers and assigned all projects and timelines while developing industry-accepted standards.
• Created and prepared product plans and system layouts with detailed documentation.
• Maintained control of project timelines while working directly with contractors, offshore development teams, and vendors.
• Introduced and implemented program/project management methodologies, including formal milestone-based plans, clear definition of deliverables, budgets, priorities, and engineering labor tracking.
• Oversaw defining and resolving critical programmatic, systematic, and technical issues and ensured engineering support to the marketing team.

Senior Front End Developer - American Apparel
Los Angeles | 2015 - 2020
• Sole Front-End Developer while implementing a new responsive website.
• Revamped mobile and checkout experiences, leading to increased conversion.
• Developed a responsive Front-End framework integrated with Oracle ATG Commerce/BCC Commerce.
• Let a small team of developers with continuous improvements on the retail website.
• Implemented A/B Testing for analysis to maximize conversion.

Developer - HdL Companies
Diamond Bar | 2014 - 2015
• Single-handedly developed an interface for a new enterprise-level web-based software system.
• Developed MVC4 web applications based on spec documentation and Photoshop mockups.
• Developed multi-platform mobile applications through PhoneGap.
